EDUCATION

The Hong Kong University of Science and Technology, Hong Kong SAR, China.

Ph.D. in Electronic & Computer Engineering 09/2018–11/2022

- Research Interests: Stereo matching, optical flow estimation, semantic segmentation, ground mobile robots, autonomous driving, computer vision, and deep learning.
- Thesis Title: Semantic Segmentation with the Assistance of Visual Features for Autonomous Driving.
- Supervisor: [Prof. Ming Liu](#).

Zhejiang University, Hangzhou, China.

B.Eng. in Mechatronics Engineering 09/2014–06/2018

- Overall GPA: 3.95/4.00 (91.10/100), ranking **2nd** out of 83 students.

WORKING & RESEARCH EXPERIENCE

The Hong Kong University of Science and Technology, Hong Kong SAR, China.

- *Research in RAM-LAB* 09/2018–11/2022
 - **Stereo Matching**
This work developed a novel network architecture that can achieve a great trade-off between accuracy and efficiency for supervised stereo matching. We also proposed an effective training strategy for unsupervised stereo matching. The proposed approach can achieve competitive performance on the [KITTI Stereo Benchmarks](#). (*Accepted by IEEE RA-L*). [\[Video\]](#)
 - **Optical Flow Estimation**
We developed CoT-AMFlow, a novel unsupervised optical flow estimation approach. Our CoT-AMFlow can achieve competitive performance on the [KITTI Optical Flow Benchmarks](#) and the [MPI Sintel Benchmark](#). (*Accepted by CoRL 2020*). [\[Video\]](#)
 - **Surface Normal Estimation**
We developed an accurate and ultrafast surface normal estimator, which can generate surface normal estimations from dense depth images. Our approach can greatly minimize the trade-off between accuracy and efficiency for surface normal estimation. (*Accepted by IEEE RA-L*). [\[Video\]](#)
 - **Drivable Area Detection for Autonomous Driving**
This work focused on improving the performance of drivable area detection with the assistance of surface normal information for autonomous driving. The proposed approaches can achieve competitive performance on the [KITTI Road Benchmark](#). (*Accepted by ECCV 2020 and IROS 2021*). [\[Video\]](#)
 - **BEV Semantic Forecasting for Autonomous Driving**
This work focused on BEV semantic forecasting for autonomous driving. The proposed approach takes past and current surrounding-view images as input, and generates the corresponding current and future semantic estimations in the BEV space. The experimental results demonstrated the effectiveness of the proposed approach. (*Accepted by ICRA 2021*). [\[Video\]](#)
 - **Drivable Area and Road Anomaly Detection for Ground Mobile Robots**
This work constructed a drivable area and road anomaly detection benchmark for ground mobile robots. We also adopted different types of visual features and proposed a novel data-fusion module to improve the detection performance. (*Accepted by IEEE T-CYB, IEEE RA-L, and IROS 2020*). [\[Page\]](#)
 - **Road Pothole Detection**
This work provided public datasets for road pothole detection. We also employed different types of visual features and incorporated different attention mechanisms into the frameworks to improve the detection performance. (*Accepted by IEEE T-IP and ECCV Workshops 2020*). [\[Page\]](#)
 - **Parking Violation Detection on a Drone**
We proposed a novel parking violation detection system embedded in a drone. The experimental results demonstrated the effectiveness of the proposed system. (*Accepted by ECCV Workshops 2020*). [\[Video\]](#)

- *Engineering Projects in RAM-LAB*
 - **Trials of the Autonomous Logistic Vehicle in HKUST** 05/2020–07/2022
This project aims at deploying an autonomous logistic vehicle (please check our IEEE RAM paper) in HKUST to deliver food and goods between restaurants and offices. I am in charge of conducting a series of tests on the campus to demonstrate that the autonomous vehicle (AV) is safe, reliable, and intelligent. We have got Hong Kong Transport Department’s appreciation that: “HKUST has been advancing the trials and becoming the **first** trialing organization in Hong Kong to carry out AVs without a driver/operator on board”. [\[Video\]](#)
 - **The Autonomous Platform in Elderly Care Centers** 09/2019–05/2021
This project aims at developing an autonomous platform to support the movement of the elderly in elderly care centers. I am the principal investigator (PI) of this project. Specifically, I designed and constructed the autonomous platform, and deployed an autonomous navigation algorithm. [\[Video\]](#)
- *Teaching Assistant*
 - ELEC 1100: Introduction to Electro-Robot Design. Fall 2019
Instructor: [Prof. Shaojie Shen](#), [Prof. Johnny Kin On Sin](#), and [Prof. Qiming Shao](#).
 - ELEC 3200: System Modeling Analysis and Control. Spring 2019
Instructor: [Prof. Wei Chen](#).

ACADEMIC ACTIVITIES

Technical Program Committees

- [3rd Autonomous Vehicle Vision \(AVVision\) Workshop](#) in conjunction with ECCV 2022.
- [2nd Autonomous Vehicle Vision \(AVVision\) Workshop](#) in conjunction with ICCV 2021.
- [1st Autonomous Vehicle Vision \(AVVision\) Workshop](#) in conjunction with WACV 2021.
- Special sessions in ICIP 2021, ICAS 2021, and IROS 2021.

Conference Presentations

- ICRA 2022, Philadelphia, USA.
- IROS 2021, Prague, Czech Republic.
- ICIP 2021, Anchorage, USA.
- CVPR 2021, Virtual.
- ICRA 2021, Xi'an, China.
- CoRL 2020, Cambridge MA, USA.
- IROS 2020, Las Vegas, USA.
- ECCV 2020, Glasgow, UK.

AWARDS

- Postgraduate Scholarship in the HKUST, 2018-2022.
- Outstanding Graduates in Zhejiang Province, 2018.
- Second-Class Scholarship in Zhejiang University (Top 10%), 2017.
- Tang Lixin Scholarship (**Lifetime**, around **0.16%** every year), 2016–present.
- First-Class Scholarship in Zhejiang University (Top 5%), 2016.
- Meritorious Winner in the Interdisciplinary Contest In Modeling (Top 13%), 2016.
- First Prize for the 7th National College Student Mathematics Competition, 2015.
- National Scholarship in Zhejiang University (Top 2%), 2015.

PROFESSIONAL SKILLS

- Programming: Python, MATLAB, C/C++.
- Frameworks: PyTorch, ROS.
- Language: Passing CET-4 and CET-6; TOEFL-IBT, 100/120.
- National Computer Rank Examination C Language Certificate of Level 2.
- C1 Motor Vehicle Driving License.
